

Intervention cases

- ” Diagnosis and Creation of the road map + support for the deployment for an aeronautical engineering company (recovery from crisis situation, management and performance drumbeat)
- ” Full renegotiation of the contracts on a serial customers panel of serial customers. Done for an aeronautical company (+8millions € for 3 years)
- ” Monitoring of several «recovery plans» for two main aircraft manufacturers: delivery planning follow up, optimization of the internal/external flows, daily drumbeat per aircraft with associated OTD (back on time after 3 months)
- ” Management of the transfer of Work for a nautical company from Gironde (33) to Loire Atlantic (44) with staff management under employment protection plan
- ” Stock Reduction and management of the delays thanks to the Theory Of Constraints, MOQ and 5S
- ” Shopfloor Reorganization of a sheet metal plant
- ” Claim management between two aeronautical companies following the stoppage of a Program.
- ” Teaching in an engineering school and management school (preparation of courses, practical works, teaching in French & English)

About me

Optimize the internal organisation of your company and achieve your strategic goals and business transformation with the support of my services.

I follow SMB and VSB to reach their change :
Diagnosis, roadmap, transition management, crisis and change management while improving their industrial performances or services.

My dual skills in operations and customer service/ program allow me to quickly grasp the issues and put the customer satisfaction back in the DNA of the company.
