DISCOVER THE FULL POTENTIAL OF YOUR DATA!

DET▲CT

Achieve your strategic productivity objectives – fast:

Accelerate productivity
Reduce costs
Improve process safety

## 50 %
reduced downtimes
Hugo Stiehl - Electronics

11 %
**average improvement
in OEE rate**
1st Tier - Automotive

€ 140T
**per year saved by optimizing
analysis steps**
GERHARDI - Automotive

30 %
**savings in quality and techni-
cal staff area**
Allit Group - Packaging

To get these results, you need to optimize your data situation.

How Detact helps you capture value with AI across key production processes

01 CONNECTIVITY

Maschines & Periphery – Direct connection of controllers and devices via OPC|UA & DA, Euromap 15/63/77/84, MQTT, Siemens S7/S5 and many more.

Third-party software – Direct connection of MES, CAQ and ERP systems such as MPDV, Arburg ALS, ProSeS, Babtec, CAQ AG, SAP, Infor, ABAS and many more.

02 SYNCHRONISATION & AI SERVICES

Automatic Data Merging – Smart data interconnection enables comprehensive overall parameter viewing.

Outstanding AI Services – AI services for autonomous manufacturing. Automated data analysis makes processes smarter and more efficient.

03 SCADA & MES APPLICATIONS

Cutting-edge AI interfaces – Ultra-modern interfaces for process transparency, diagnostics and digital assistance on the shop floor.

MES-Light Applications – MES functions are provided on demand and thus at low cost. Optionally in the cloud.
