Industrial IoT Platform

Empowering IoT with AI

Deviceye Platform

Deviceye is an integrated Industrial IoT solution for tracking & monitoring environmental and personal parameters to increase work efficiency.

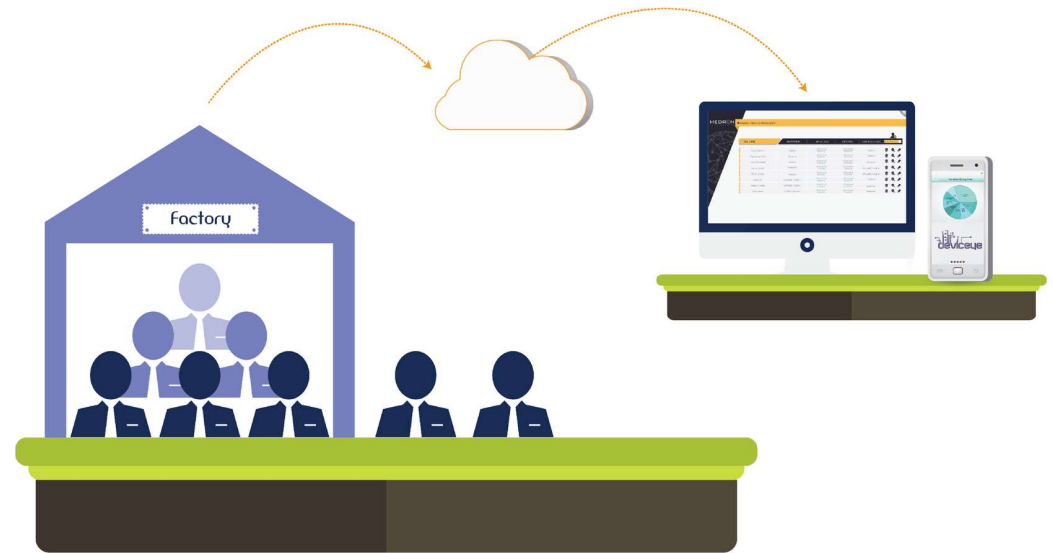

DevicEye Platform

- Data Collection and Tracking Solutions
- Real-time and Advanced Analytics
- Flexible and User-Friendly Interface
- Integration and Cohesion

Our Solution

● Tracking Platform

Personnel, customers, visitors or objects are tracked with tags. It can be managed region-based, rule-based, date-based. It has a detailed interface and module infrastructure.

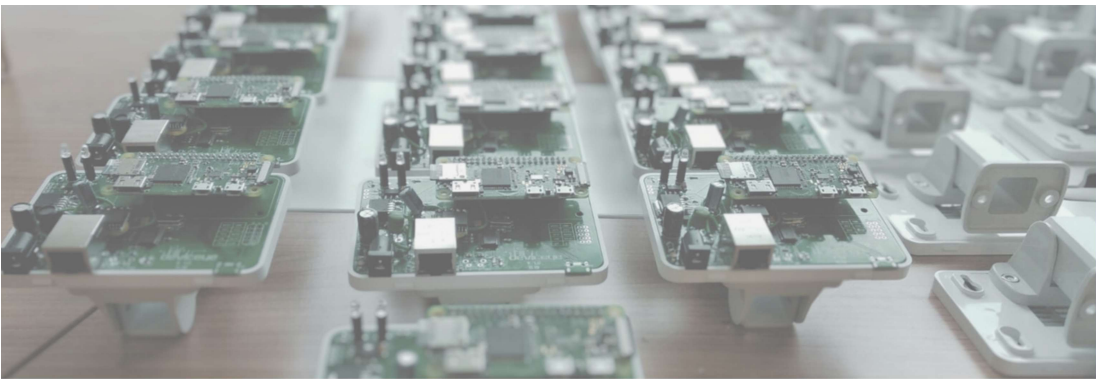

● Data Collection

It is capable of collecting data for all existing digital or analog sensors. Very quickly the data is visualized and integrated into all modules.

● Smart API

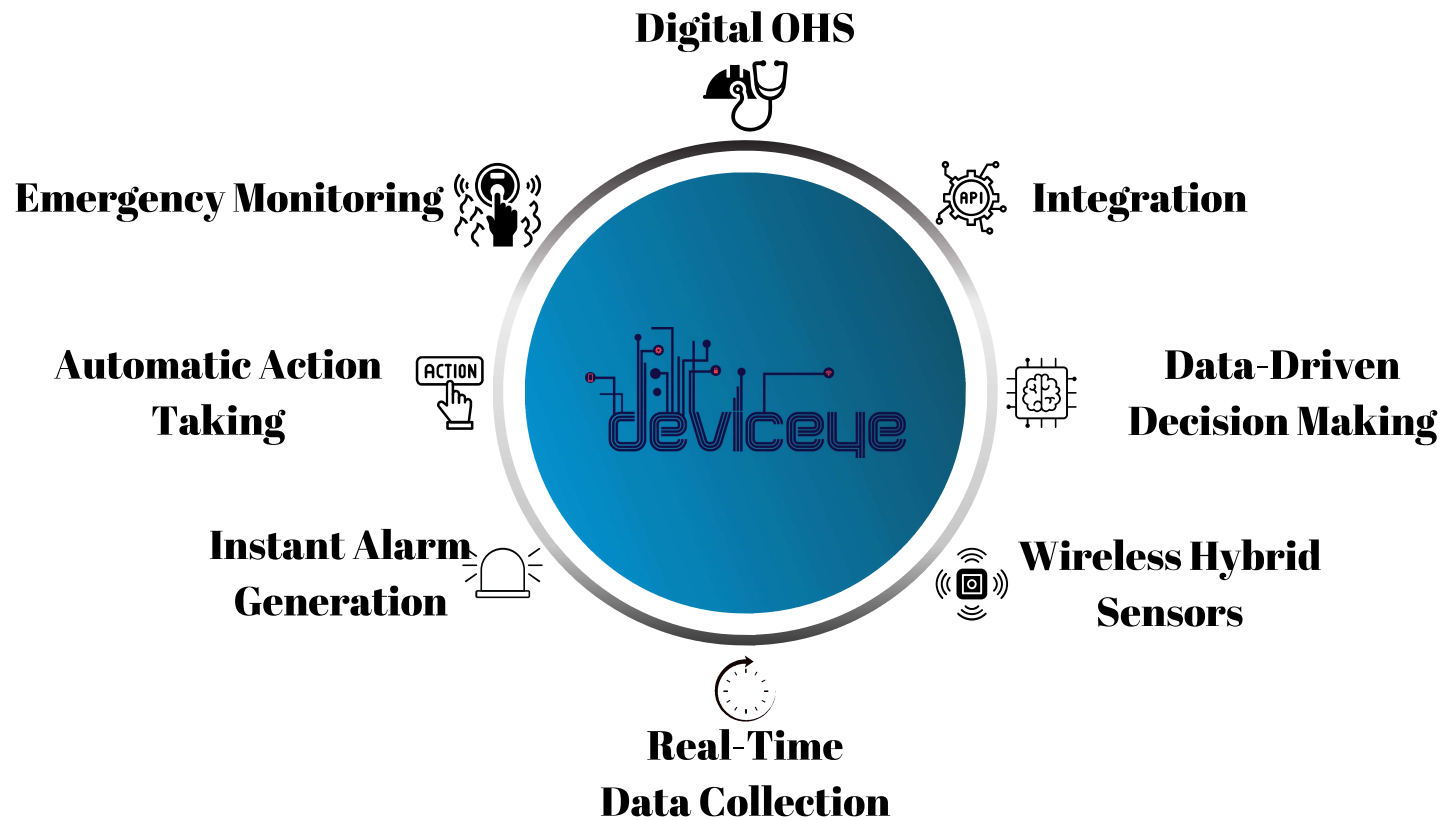

With its integration capability, the platform provides fast solutions by sharing data with all kinds of management software such as ERP, CRM, WMS

Benefits

Deviceeye has successfully produced solutions for different industrial sectors. It has made a difference with its high customer satisfaction and maintenance-free equipment, modular and flexible platform.

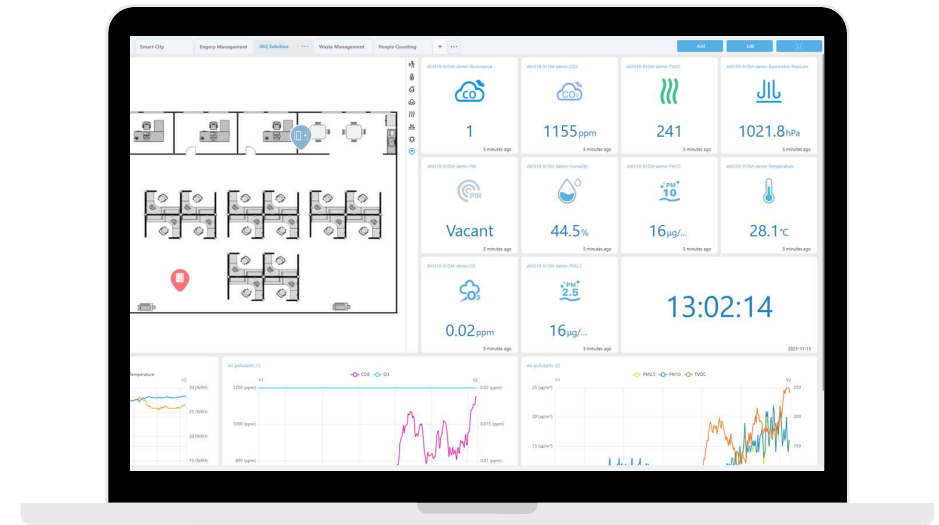

Sample UseCase

- Location Based Tracking Solutions

- Determining the real and correct working hours of employees
- Detection of non-working periods such as break, cafeteria
- Detection of time spent outside defined workspaces
- Prevention of human error with the integration of ERP and PDKS programs
- Calculation of total labor spent by department

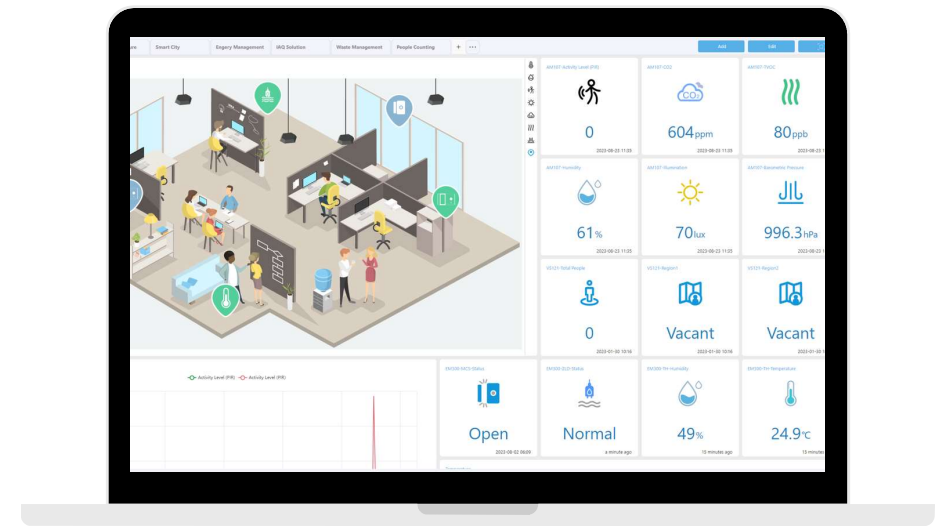

Location Tracking Example

Sample UseCase

- Environment Monitoring Solutions

- Temperature, Humidity, Air Quality, Water leakage, UV, etc. sensors
- Defining rules involving different sensors
- Taking automatic action according to the set values
- Data collection with long battery life and high accuracy
- Plug and play sensors

Environment Monitoring Example

Thank You
